

Quick Guide – Installation & Data Transfer

This guide shows you how to install the SENS motion app and send your sensor's data to the cloud.

! The sensor stores up to 10 days of data. To avoid a full memory, transfer data at least once a week. Always transfer all data before turning the sensor off.

- 1 Download the app by searching "SENS motion" in the App Store or Google Play, or scan the QR code below:

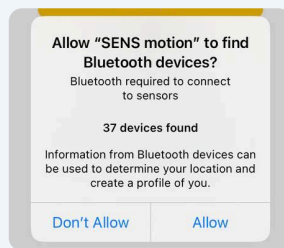

ANDROID

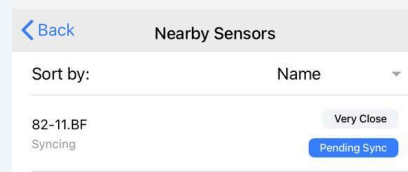

IOS

- 2 Enable Bluetooth the first time you open the app

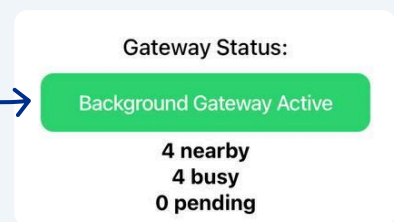

- 3 Tap "Advanced" to see nearby sensors listed under "Nearby Sensors"

- 4 Keep the app within 10-15 meters of the sensor. The app must remain open to transfer data

- 5 Check the Gateway Status on the main screen:

- Green – Data is ready to transfer
- Yellow or Red – Restart your phone and ensure Bluetooth is on

- 6 Save a favorite sensor (optional):

1. Tap the blue "ADVANCED" button
2. Select the sensor and choose "Set Favorite"
3. The sensor's status will now appear on the front page
