

Quickguide - Sensor And Patch-B

This guide will show you how to mount the sensor easily and comfortably so you get reliable measurements throughout the entire wear period.

! The patch is worn discreetly on the thigh 24 hours a day. Replace the patch when it begins to loosen - usually after approximately 14 days. If redness or irritation occurs during use, remove the patch immediately.

- 1 Check the kit items before start

- 2 Open the patch (1) and put the sensor on it

- 3 Press the patch thoroughly around the edges of the sensor to secure it

- 4 Open the package and clean the area with the cleaning wipe before applying the patch

- 5 Remove the back of the patch (2) and apply it on the side of the thigh around 10 cm above the knee (the arrow should point downwards)

- 6 Remove the adhesive (3) and press the patch on your skin to ensure it is correctly fixed
